# South Sound Industrial & Hand Therapy

At South Sound Industrial & Hand Therapy – Olympia we offer a full range of service offerings including physical, occupational, hand and massage therapy services. In addition to offering traditional therapy services, our clinic also specializes in providing workplace rehabilitation, conditioning, hardening; and functional capacity evaluations (FCEs) and physical capacity evaluations (PCEs). These offerings allow injured workers to receive a full spectrum of care in one location for the duration of their rehabilitative journey, maximizing the continuity of care needed to safely return an injured worker back to their job in a timely manner.

Our providers create individualized programs for each patient to help them in reaching their personal treatment goals. We strive to provide decreased pain and increased mobility, function, strength and endurance to each person that we work with so that all individuals can become the healthiest version of themselves.

Wondering if you need a referral from your doctor to start treatment? **Washington is a direct-access state**, meaning that you can start physical therapy without one in-hand. Start your road to recovery, and let us handle the rest!
